FFP1 Mask

KINGFA-FFP1

Specially positioned nose clip does not pose any rupturing or dislocation risk or related injury risk. It maintains its features even after repeated usage. Its special thermal bonding layer gives it a reinforced body that is resistant to deformation, perspiration-related problems and collapse.

The balance between the flexibility and pressure of the featured knitted headbands makes for increased comfort. They also will not lose flexibility or pressure in hot or cold working conditions. It is suitable for use with the other Personal Protective Equipment such as helmets, safety glasses and ear protection.
