

MOBILIZE RS601 RESCUE STRETCHER

- The best rescue stretcher for confined space, high angle or technical rescue, and traditional land-based applications. The Sked stretcher is a revolutionary design which provides outstanding patient protection and security.
- The MOBILIZE RS601 comes equipped for horizontal hoisting by helicopter or vertical hoisting in caves or industrial confined spaces. When the patient is packaged the stretcher becomes rigid. The durable plastic provides protection for the patient while allowing extrication through the most demanding confined spaces. The stretcher is rolled for storage in a tough Cordura backpack making it easy to transport or store & compact enough for any rescue situation.
- The MOBILIZE RS601 Rescue Stretcher, can be lifted vertically or horizontally by winch, whether on a tripod, crane or helicopter. It has become the confined space rescue of choice and has been used on major infrastructure projects. Able to be carried or dragged the RS601 Rescue Stretcher is probably the most versatile stretcher available.
- The RS601 Rescue Stretcher is used by virtually every rescue team in any rescue scenario including the military, emergency rescue services and industry. Whether oil and gas, mining, construction or wind farms, anywhere there may be a need to have a solution to a real or potential danger or hazard the RS601 is well suited.
- **Other options:**
All parts belonging to the RS601 Basic Rescue System are available separately. In addition water rescue systems can be purchased to use in conjunction with the RS601 Basic Rescue System either at time of purchase or later. These just attach simply and easily to keep the patient in a near vertical position in the water.

FEATURES:

- Light weight corrosion resistant design provides durability.
- Comes Equipped for hoisting by helicopter in horizontal.
- position or hoisting in vertical position in industrial safety.
- The stretcher is rolled for storage in a tough cordura.
